new mac setup

new mac setup -- Aug 4 2026

Basics

- [x] migrate nothing; fresh install, pull from iCloud + GitHub
- [x] Homebrew, git, gh, node (via fnm), python (uv), postgres
- [x] VS Code + settings sync; Claude Code; iTerm2 profile
- [x] FileVault on; Time Machine to the external drive
- [x] FL Studio reinstall + plugin licences (keep the licence emails!)

Dotfiles

- [x] zsh config from the dotfiles repo
- [x] ssh keys: new key for this machine, add to GitHub, revoke the old laptop's key after a week
- [ ] gpg signing -- later

Research stuff

- [x] Zotero + Better BibTeX; library syncs, storage folder relinked
- [x] Overleaf: nothing to install
- [ ] old laptop: copy ~/Desktop/papers and ~/Downloads PDFs I still need before wiping

Don't forget

Wipe and return the old VT laptop to the department after the leave paperwork is done.
